**WELCOME**

The 14<sup>th</sup> International Conference of the International Association for Computer Methods and Advances in Geomechanics (14IACMAG) will be held in Kyoto during September 22-25, 2014. The aim of the conference is to give an up-to-date picture of the broad research field of computational geomechanics. Contributions from experts around the world will cover a wide range of research topics in geomechanics.

IACMAG organizes its conferences about every three years. The first conference in this series was held at Waterways Experiment Station, Vicksburg, Mississippi, USA in 1972, and the subsequent were held in Blacksburg (USA) - 1976, Aachen (Germany) - 1979, Edmonton (Canada) - 1982, Nagoya (Japan) - 1985, Innsbruck (Austria) - 1988, Cairns (Australia) - 1991, Morgantown (USA) - 1994, Wuhan (China) - 1997, Tucson (USA) - 2001, Torino (Italy) - 2005, Goa (India) - 2008 and the 13<sup>th</sup> International Conference on Computer Methods and Advances in Geomechanics was held in Melbourne, Australia in 2011.

**CONFERENCE TOPICS AND THEMES**

The IACMAG conference series have covered computer methods, material modeling and testing, applications to a wide range of geomechanical problems, and recent advances in various areas that may not necessarily involve computer methods. These include: development and usage of new materials; constitutive modeling of materials including deformation, damage and failure; verification of existing and new constitutive models; micro-macro correlations of material response including non-destructive testing; new techniques for material and site characterization; computer aided engineering and expert system; innovative construction using new materials and computer methods; design and rehabilitation of infrastructure; use of system and optimization procedures; and remote sensing.

**ABOUT KYOTO**

Natural scenery, temples, shrines, towns and homes intermingle with a poignant historical beauty. Whether it is the Gion Festival, the Tea Ceremony or Japanese flower arrangement or Nishijin-brocade, so many aspects of Japanese culture continue to thrive in Kyoto. Over a period of 1,200 years, dating from the decision to move the capital to Kyoto in 794, it nurtured a splendid, delicate and unique kind of culture, and over the course of history came to be considered the mother of culture within Japan.
