| • L. Faure       | • N. Saiyouri |
| • A. Giraud      | • H. Zahrouni |
| • L. Ighil-Ameur | • D. Zhao     |

## Engineering Mechanics Topics

The organization of the EMI Conference in Europe will be an excellent opportunity for interactions and exchanges within the mechanics community in and around Europe, as well as an opportunity to become familiar with EMI (Engineering Mechanics Institute of the ASCE) activities, and what EMI has to offer in terms of possibilities for participation in meaningful committee activities, collaboration with peers and development of one's network.

Topics in the field of Engineering Mechanics, Applied Mechanics, and Materials will be considered.

## Venue

The conference will be held at Université de Lorraine in the historical heart of Metz. Near the border with Germany, Luxemburg, and Belgium, Metz is a very beautiful city in the East of France and only 1h20 from Paris by train.
