
PhD-Student in Geo-Engineering

The PhD-student will work under the guidance of a professor on a research theme but will also assist in teaching to a certain extent. She/he should finish the work with a doctoral degree in engineering science. The candidate will have to work on the following theme:

Bearing capacity of foundation piles

The candidate should have the following qualifications:

- Master-degree in Civil Engineering or other related engineering degree (before the start of the research)
- Profound Knowledge in Geo-Engineering, Soil and Rock Mechanics
- Competence in Finite Element Modelling.
- Language: High level of English; German, French or Dutch will be a plus
- Basic competence in geotechnical lab experiments will be a plus
- Starting the PhD research between the 1st of March and 1st of September 2016
- Willingness to inscribe as PhD-student at the University of Luxembourg

Applications (Motivation letter in English, CV, PDF of MSc graduation project, copies of diplomas including full list of marks) can be uploaded (see <http://emea3.mrted.ly/ux6z>) or sent by e-mail, as soon as possible, but at least before the 1st of May 2016 to:
